[ FIXED LIGHTS, RAKES AND ARCHES ]

*enhanced living*

**Fixed windows are stationary windows often used to compliment other window and door suites. Fixed windows allow you to incorporate maximum natural light, without compromising your design or view.**

Windows of unusual shapes and sizes are nothing out of the ordinary for us. Curved, raked, arched, faceted, stepped and decorative window shapes along with curved glass and glass blocks are all available to suit any architectural style.

All our windows and doors are made to architectural specifications allowing your individual tastes to show through.

## High Performance Solutions

A Solar Comfort™ system is the perfect choice for keeping comfortable temperatures all year round, despite the outside extremes. Spend less on heating and cooling your home and help the environment.

A Solar Block™ system is ideally suited to locations where keeping out the heat, glare and damaging UV rays are a priority, without affecting your view.

Sound Smart™ is a system that reduces external noise. By simply installing the right window and door system, you can 'turn down' the sound to far more comfortable levels.

Note : Products may be subject to local variation or climate requirements.
