S - Sliding Panel **F** - Fixed Panel

Viewed from exterior

FSSF Windows are available in sizes 1810 in width and larger.

Standard 1500 HIGH Windows are Available.

Codes: SF (Sliding-Fixed) windows illustrated above can be reversed and supplied as FS (Fixed-Sliding) if required.

Note: Clearly nominate code numbers when specifying and/or ordering.

The letter(s) at the beginning of the code indicates the window type, e.g. SF0606 indicates Sliding-Fixed type window.

The first two numbers indicate the approximate height, e.g. SF0606 indicates nominal 600 mm high.

The last two numbers indicate the approximate width, e.g. SF0606 indicates nominal 610 mm wide.

The letter T at the end of the code (not on all windows) indicates transom, e.g. SF2006T, T=Transom.

Non standard frame sizes are available on request.

All measurements are in millimetres and are coded for ordering purposes.

Height is always given first - **window sizes are finished window sizes and do not include building-in fin.**

When ordering please state left or right hand opening as viewed from the exterior of building.
